LASER TREATMENTS

a brighter solution for dull skin

*You'll be amazed at how much younger
you can look and feel with ThreeForMe™ .*

The Brighter Solution for Dull Skin

As we age we commonly feel our skin appears to be tired and not as vibrant as it once was. This is due to aging, sun exposure and genetics.

Now it's easy to get back that brighter skin you desire!

What is ThreeForMe™?

ThreeForMe laser treatment is the proven way to solve three common skin concerns all at once! With this treatment you'll see visible improvement in:

- 1 Wrinkles
- 2 Sun damage
- 3 Facial veins

“I love the results and would certainly recommend to friends and family. The downtime is so minimal and you'll see visible results.” – Andrea O.

How does it work?

The procedure is exclusive to the clinically proven Icon™ device and is performed in two steps, or “passes”:

1. Treats discoloration and facial vessels using a technology called Intense Pulsed Light (IPL)
2. Treats fine lines, wrinkles & textural irregularities using a fractional laser technology that helps generate collagen and elastin – the key support structures of your skin

The Treatment

- Most people feel only minimal discomfort, similar to the snapping of a rubber band accompanied by some heat in the treatment area.
- Your technician may use comforting techniques such as topical numbing creams or cooled gel packs to further enhance your experience.
- It is typical to see minor redness and swelling similar to a mild sunburn but this should resolve in just a few days.

What to Expect

- You will see continuing improvement in the skin's appearance during and after a course of treatment.
 - Improvement in facial vein immediately
 - Brown spots will flake off after 1-3 weeks
 - Progressive improvement in fine lines, wrinkles and scars over the next 6 months

It's Safe.

Gentle, non-invasive procedure with Skintel® technology to customize treatments for every patient.

It's Quick.

30 minute treatment that fits into your schedule.

It's Convenient.

1-3 sessions with minimal social downtime.

It's right for you.

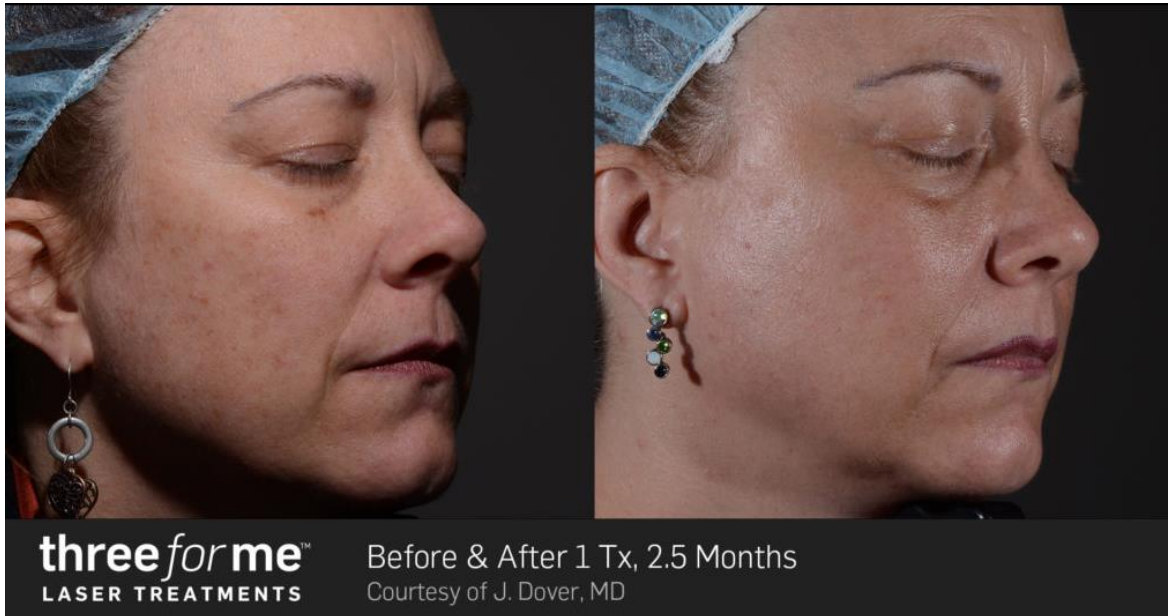

Real people. Real results.

Frequently Asked Questions

Am I a candidate?

The treatment can be safely used on most skin types and for common aging and sun-related skin conditions including wrinkles, sun spots and facial vessels.

Is it safe?

Treatments are clinically proven to be safe and effective.

How many treatments will I need?

A typical course of treatment involves 1-3 procedures at one-month intervals.

Frequently Asked Questions

How long does it take?

Treatments are quick and take approximately 30 minutes.

How will it feel?

Most people feel only minimal discomfort during the treatment, similar to the snapping of a rubber band in addition to some heat at the treatment area.

How long before I can resume normal activities?

Typically, you can resume regular daily activities the same day as your treatment although due to some redness and swelling you may experience a day or two of social downtime.
